Web developer skilled in Python, TypeScript, and node.js frameworks, seeking to build scalable, responsive applications aligned with modern industry standards.

Skills

- TypeScript
- React
- NestJS
- NodeJS
- REST APIs / GraphQL
- PostgreSQL
- Tailwind CSS
- Redux
- Git / Version Control
- Automated Testing
- CI/CD basics
- Docker basics

Experience

APRIL 2025 – JULY 2025
Freelance Full Stack Developer / AlloGaz, Zgharta

- Built a full-stack web application using NestJS and React.
- Designed and implemented GraphQL and REST APIs.
- Developed a responsive UI with tailwind CSS and improved UX with Redux Toolkit and state management.
- Optimized data access using debounced queries and indexed database lookups.
- Integrated Google Cloud Storage for file management and automated backups.

Education

AUGUST 2025
B.Sc. in Computer Science / Lebanese University

Relevant coursework: Web Development, Databases, Software Engineering.

Languages

- Arabic: Mother-tongue.
- English: Fluent.
- French: Advanced.
- Spanish: Advanced.

Personal Projects

Team Management Web App

NestJS Github Repo: https://github.com/Elie-50/project-management-backend
React Github Repo: https://github.com/Elie-50/project-management-react

- **Technologies used:** React, NestJS, TypeScript (frontend & backend), PostgreSQL, TypeORM, TailwindCSS, GitHub Actions (CI).
- **Key Features:**
    - Task creation, assignment, and deadline management for teams.
    - Role-based user permissions (Admin, Member) for secure access control.
    - Fully responsive design for mobile and desktop users.
    - Seamless integration with PostgreSQL for data storage.
    - Continuous integration and testing through GitHub Actions.
    - Dockerised for easy deployment.
